

Linear Scale

Brand: Optronics

Category: DRO And Linear Scale

Features

- Response speed: over 60 meters per minute
- No intermediate interface is needed over 100 meters long-distance data transmission
- Five bearings for excellent repeatability
- Signal cable is protected with multi-layer isolated network and metal soft shell for anti-jarring and water-proof
- Made of aluminum, the scale body is resistant to scratches and corrosion
- Dust sheet is made by special plastics, with lower friction
- Easy installation and maintenance by special design, with good watering-proof and dust-proof
- The sensors adopt the glass precise computation raster as the measuring benchmark
