

## MERCURY

**Brand:** Tomelleri

**Category:** Portable Measuring Arm CMM

### THE HIGHEST ACCURACY MADE EASY

The line MERCURY is the result of all the experience we gained during over 30 years of Articulated Arms production. Further improved by new hardware solutions, this arm reached a level of accuracy never seen before.

#### Features

1. The result of our experience
2. Perfect balance
3. Home position in front
4. Ready to operate

#### 1. The result of our experience

The MERCURY Arm is the result of over 30 years in the manufacturing of high-end Articulated Arms. Further improved by a new hardware and software solutions, this arm reaches a level of accuracy ne-ver seen before.

#### 2. Perfect balance

The MERCURY Arm is characterized by a completely new handling solution with an optimized mass counterbalance, making the arm very light in the hands and ensuring an immediate confidence.

#### 3. Home position in front

Thanks to the innovative counter-balance, the MER-CURY Arm has a safe home position directly in front of the operator. To take the arm and put it back has never been so quick and easy.

#### 4. Ready to operate

The MERCURY Arm is designed to obtain the best performances with the best handling conditions. The arm can be placed directly on the supporting surface without fixation, or on a tripod, as for user preference.

### CONFIGURATIONS

- With 6 axes configuration
- With fixed probe or Autojoint interchangeable system
