

## Renishaw PI 200-3 Probe Interface

Category: Renishaw Racks And Accessories

### PI 200-3

A dedicated interface unit which powers and services the TP200 probe, standard touch-trigger probes and up to two SCR200 stylus changing racks.

The PI 200-3 interface is a dual purpose interface designed to process signals from the TP200 strain gauge probe and the TP20 / TP2 / TP6 touch-trigger probes. Special auto-selecting electronics within the interface allow exchange of these probes without any changes to the interface.

**TP200**  
Compact strain-gauge probe with module changing

**TP20**  
Compact kinematic probe with module changing

**TP2**  
Small, light, versatile probe

**TP6(A)**  
Robust kinematic probes with M8 and autojoint mounting options

**SCR200**  
Stylus module rack for use with TP200
