

Renishaw MRS2 Modular Rack System

Category: Renishaw Racks And Accessories

MRS2 modular rack system

The MRS2 modular rack system is a versatile probe and stylus changing solution for Renishaw sensors.

MRS2 is available in a variety of leg and rail lengths to allow it to be configured to various applications. In instances where CMM working volume is at a premium, or there is a need to carry large numbers of probes and styli, additional rails can be added to MRS2 to create multi-tier racks.

The rail is compatible with:

- SCP600 and SCP80 (stylus change ports for SP600 and SP80 respectively)
- ACR3 (autochange rack)
- FCR25 and FCR25 TC (stylus and module changing for SP25M and RPS3-# stylus holders)
- RCP2 (change port for RSP2 and RSP3-6 stylus holders) and RCP TC-2 (thermally controlled REVO change port for REVO probes)
- SFA and SFCP (for REVO surface finish probe)

MRS2 options

Rails

MRS2 rails are available in lengths of 400 mm, 600 mm or 1000 mm.

Legs

MRS2 legs are available in lengths of 200 mm, 400 mm, 600 mm and 800 mm.
